

## CTMR List 15

1 CS L1, R1 CT, MR  
MR 2-19-08, CT 2-19-08

Normal 47y/o female clencher  
Discs on the thin side of normal  
Slight Hyper Ca+ clenching  
3D midlines off- 4 bi extraction, high angle,  
3D see metal filling scatter

2 HPO L4a, R4a MR  
Locking, big discs

25y/o female  
Large discs, Locking  
distalized condyles, good size and shape  
R T2 joint effusion

3 PHe L4a old, R3a lat CT, MR

R condyle centered, Left distalized  
Good size and shape bone, slight hyper Ca+  
L4a Thin posterior band from clenching  
R3a sits Lateral  
sticky disc displacement  
NTI tx worked well  
good contrast to PH thin verse thick disc

4 KaP, L4a-e, R 5a CT, MR  
OA Active

jva shows click, JVA helps diagnose left click

5 KS L1, R4b AVN CTMR

Pre AVN Decorticate  
Bone marrow is uneven and dark  
21y/o
